## **MATHS AND SCIENCE ENRICHMENT PROGRAMME TESTIMONIAL**

In reflection of the work done by L&T Private Tutoring in the provision of extra classes to learners at **Charora Secondary school**, it is highly appreciated of the value that has been added to the academics of the learners. The organisation showed great level of professionalism in its conduct and its method of reporting. The team was very quick to respond to challenges faced in the programme so that both the company and the principal can address them.

The programme has been a great source of confidence and purpose for the learners as many of them showed improvement in both their results and their motivation to study more. It was initiated on **September 2019** and ran for a length of 3 x months with good improvements to learners' marks in the final exams. Learners who were part of the programme expressed that the programme was very helpful to their understanding of Mathematics and Physical sciences.

Although the programme ran for a short period of time, the impact on learners was truly of notice. I give my highest appreciation for the programme and huge thank you to everybody involved in the programme.

**Regards**

Barry Grobler
